

SYSTEM AND METHOD FOR INSTALLING SOFTWARE ONTO A BUILD-TO-ORDER COMPUTER SYSTEM USING AN IDENTIFICATION DEVICE

5

Abstract of Disclosure

A system including a server, a computer system, and a device coupled to a port of the computer system is provided. The server includes a script associated with an identifier. The device includes the identifier. The computer system is configured to read the identifier from the device, provide the identifier to the server, and cause a script associated with the identifier to be executed to cause one or more software components to be installed onto the computer system.
